Issue

A client in the chemical industry with locations worldwide had a Credit Insurance Program with more than 160 individual local policies and was looking to restructure the program to reduce complexity and administration.

Solution

Close coordination and teamwork between the client and AIG’s Trade Credit and Multinational experts facilitated the implementation of a global Excess of Loss Trade Credit program and the strategic implementation of a Global Credit Management Guideline.

Why is this important?

In times of increased volatility and uncertainty, effective balance sheet protection, through a global AIG Trade Credit Excess of Loss solution, enabled the client to benefit from a high level of autonomy in combination with maximum stability of coverage based on non-cancellable credit limits.
